

Simplex Satellite Device AXTracker MMT

AXTracker MMT is a low cost “place and track” satellite tracking unit with a long life battery and near global coverage. Just attach it to your asset and it will report the location and motion status of your asset for up to 7 years.

AXTracker MMT’s simplex operation replaces the need for costly, complicated, and power-consuming two-way communication devices on those assets that only require one-way communication. The MMT’s low profile and stealth design allows it to be easily installed without the need for harnesses, external power or antennas.

Features:

- Self contained - simple installation
- Self powered - no external power or wiring harnesses required
- In the field activation
- Up to 7 years battery life

Specifications	
Network	Globalstar Simplex Satellite
Mode of Operation	Wake, GPS locate, transmit location, resume sleep
Message Triggers	Time of day, interval, motion alarm
Message Contents	GPS co-ordinates, motion alarm value
Integrated Motion Sensor	Yes
Alarm Inputs	Nil
Primary Power Source	Battery - Primary lithium cell
Secondary Power Source	Nil
Battery Life	Up to 7 years (based on 2 updates per day)
Size	102mm x 280mm x 26mm
Enclosure Rating	IP67
Other Certifications	Intrinsic safety (UL class 1, division 1 groups A, B, C, D) for US and Canada
